COURSEWINNER V3 COMMODORE 64

To load the tape, type LOAD (RETURN) and press play on the tape. When the READY notice appears, type RUN (RETURN) and leave the tape running.

Conversion to disc

1) Change line 3820 to

```
3820 OPEN1,8,2,"@Ø:CFJTB,S,W"
```

2) Type RUN and load the datafile from tape.

3) When the menu appears, use funtion "D", then "S" to save the datafile to your disc.

4) Break out of the program and change the following lines:

```
52      OPEN1,8,2,"CFJTB,S,R"
4510    OPEN1,8,2,FF$
4610    OPEN1,8,2,FF$
```

5) Insert two new lines into the program :

```
4508    PRINT HO$:INPUT "RACE NUMBER...";FF$:
        FF$="@Ø:RACE"+FF$+",S,W"
4608    PRINT HO$:INPUT "RACE NUMBER...";FF$:
        FF$="RACE"+FF$+",S,R"
```

6) SAVE the converted program to your disc.

Repeat the process using the alternative data file, and a new disc. Each time you load or save race data, you will be prompted to insert a race number to identify the race (make a note of which number refers to which race). When you have finished with data on one race, re-use the number for another race (to avoid filling your disc with redundant data). Race numbers have no significance except for your reference.
